## Davos Planters Round

Shown in Nero Nuovo

### GFRC

Campania's GFRC, Glass Fiber Reinforced Concrete, is a Portland cement based composite material with moisture resistant glass fibers randomly dispersed throughout the material. The fibers serve as reinforcement to enhance the concrete's flexural, tensile, and impact strength. The glass fibers used are high zirconia alkali resistant. Our GFRC is manufactured using the spray up technique resulting in a wall thickness of approximately 1/2" (tolerance +/- 1/8"). The high compressive strength of our GFRC results in a frost proof, thaw proof, rust proof, and fire proof material that meets the standards for commercial use. GFRC is manufactured and imported from our partner factory in the Philippines.

Available in a choice of thirteen (13) exclusive natural pigment stains. All of our patinas are hand applied in a multi-step process which produces unique and beautiful surface finishes. Designed to replicate the look of naturally aged materials, the patinas will not prevent the natural aging process that occurs in an outdoor environment. Rather than creating uniform stains, our approach gives our products their unique beauty and appeal.

Material	Item Description	Item #	Outside Dimensions	Inside Top Dimensions	Base Dimensions	Weight	Approx. Soil Capacity
GFRC	Davos Round 3024	GFRC-0202	30"W 24"H	26.5" Diam.	18" Diam.	70 lbs	6.5 cu ft.
GFRC	Davos Round 3630	GFRC-0201	36"W x 30"H	30" Diam.	21" Diam.	105 lbs	11 cu ft.
GFRC	Davos Round 4840	GFRC-0200	48"W x 40"H	42.75" Diam.	27" Diam.	170 lbs	26 cu ft.

**Note:** Each planter is equipped with drainage holes.

### AVAILABLE COLORS

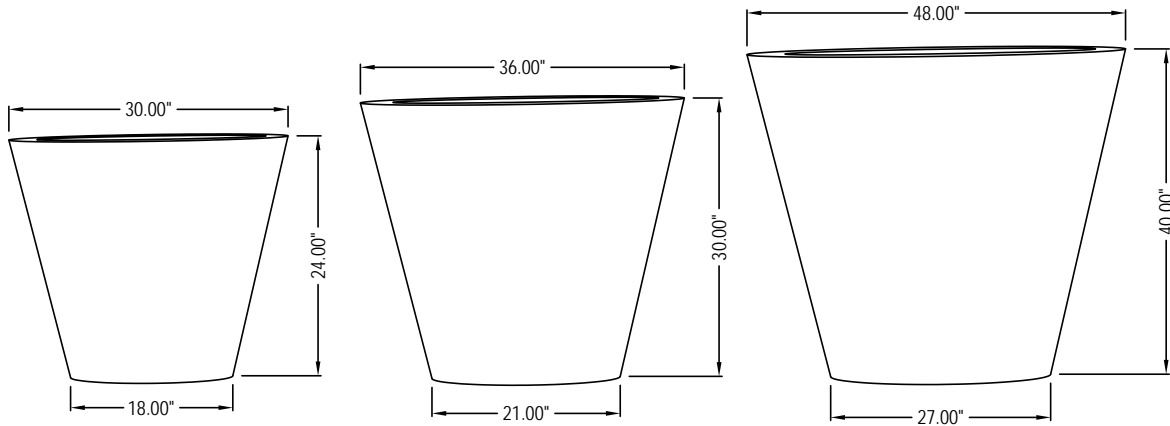

**Please note:** Actual colors may vary slightly from those depicted below. Color samples are available upon request. Call 215-541-4627 for more info.

**Materials:** portland cement, high zirconia alkali resistant glass fibers, water

**Care & Maintenance/Outdoor Planting Instructions:** Our GFRC planters are equipped with pre-installed drainage holes and raised feet to allow for drainage. The drain holes must be kept clear to maintain the longevity of your planter, especially in climates that undergo freeze thaw cycles in the winter. We recommend: Covering the drain holes with a mesh screen or equivalent to keep debris from clogging the openings; Filling the bottom of the planter with non-porous drainage material; Filling the remainder of the planter with a well-draining soil mix that will not retain water; and lastly, covering the soil with decorative mulch or pine bark to the top rim of the planter to discourage water from pooling on the surface.

**Cleaning Instructions:** Campania GFRC planters can be cleaned with a combination of water and mild detergent and a soft cloth, sponge, or brush. Do not pressure wash, apply corrosive cleaners or clean with anything abrasive. Note that it may take several cycles of wiping and drying before the planter is completely clean.

**Warranty:** Campania International, Inc. provides a limited 3 year warranty for material and manufacturing defects only assuming proper product care and maintenance as described in Campania's product specifications. Please refer to Campania's care instructions for proper care and maintenance. In addition to the failure to properly care for and maintain the product, this limited warranty does not apply to any defects which occur in the color or surface of the product which are the result of natural weathering, exposure to the elements or improper winterization. Campania International, Inc. will not be held liable for any incidental or consequential damages, including but not limited to damage to any plants which may have been planted in the product.
