Del Corso Planter Vicolo Antico Collection

Shown in Vicolo Mare

Vicolo Antico

Inspired by the haunting beauty and weathered pigments found along ancient Roman alleyways or “vicoli”, Campania’s Vicolo collection perfectly embodies the design philosophy of wabi-sabi, which finds beauty in imperfection and authenticity. Offered in 2 glazed collections: Vicolo Terra and Vicolo Mare.

Glazed and Terra Cotta Collection

Campania’s glazed and terra cotta planters are hand made from natural clay using traditional artisanal techniques and high-fired at temperatures between 990-1000 degrees centigrade to ensure frost resistance and durability. Glazed planters are coated with natural glazing elements that are baked onto the surface to enhance the products resistance to weathering.

Please note that actual colors may vary slightly from those depicted here.

Material	Item Description	Item #	Available Colors	Outside Dimensions	Planting Dimensions	Base Dimensions	Approx. Weight
Glazed	Del Corso Planter - S/1	5007-18001	(180) Vicolo Mare	25"W x 21"H	16"W x 21.25"H	15" Diam.	131 lbs

Note: Planters have drainage holes.

COLORS

The Vicolo Antico collection is handmade and wood fired in traditional kilns by artisans in Vietnam creating a unique expression of artistry, skill and workmanship. Rather than creating uniformity, the handmade quality gives this collection their unique beauty and appeal — no two pieces will look exactly alike.

Materials: Natural clay and natural glazing elements

Care & Maintenance/Outdoor Planting Instructions: There is no such thing as a 100% frost-proof planter. The freeze-thaw cycles that occur in winter will cause any water in the container to freeze and expand which may cause the container to crack. It is best to store the item in a dry place out of the elements. Our Glazed and Terra Cotta planters are equipped with pre-installed drainage holes to allow for drainage. The drain holes must be kept clear to maintain the longevity of your planter, especially in climates that undergo freeze thaw cycles in the winter. If you are unable to bring a planter out of the elements: We recommend covering the drain holes with a mesh screen or equivalent to keep debris from clogging the openings; Filling the bottom of the planter with non-porous drainage material; Filling the remainder of the planter with a well-draining soil mix that will not retain water; and lastly, covering the soil with decorative mulch or pine bark to the top rim of the planter to discourage water from pooling on the surface. For indoor use, Campania can source saucers for special orders and plugs are available upon request.

Cleaning Instructions: Campania Glazed and Terra Cotta planters can be cleaned with either mild soapy water or Windex® with Ammonia-D. Spray down the surface of the planter where it is dirty and use a lint-free cloth or sponge to wipe the surface. Note that it may take several cycles of wiping and drying before the planter is completely clean. Do not pressure wash, use alcohol based cleaners, apply corrosive cleaners or clean with anything abrasive.
